Ta·Da

MEXICO
DEC / 2025

Lovers Plus growth is unlocked by removing friction — not by persuasion

EXECUTIVE ONE PAGER

TaDa has become invisible infrastructure

It wins by removing effort — and loses when effort comes back.

If TaDa disappears, users must go out, carry bottles, spend time, and plan again.

→ Value is only noticed when it's gone.

Effort removed
・Go out ❌ ・Carry ❌ ・Wait ❌

Why this is true

What drives habit

・Same SKUs, same formats, repeated
・Everyday and spontaneous usage
・No planning, no thinking

What breaks habit

・Product unavailable
・Outside operating hours
・Delivery uncertainty

📌 **Users don't leave by choice — they leave by friction.**

SLA is a behavior trigger

・Operational SLA performance defines how predictable the end-to-end order journey feels.
・Small inconsistencies in ops compound over repeated orders and erode trust.
・Consistency across ordering, picking, and delivery matters more than peak speed.

🔥 **Critical threshold**

When the operational SLA is consistently met, TaDa shifts from an app users decide to use to a service they rely on.

📌 **This explains the higher recurrence and retention observed among Lovers Plus.**

What we do

Double down on

・Availability of top SKUs (non-negotiable)
・SLA consistency (especially <15 min)
・Extended hours in high-frequency zones
・Habit-based benefits (not campaigns)

Review

・Promo-heavy tactics for Lovers Plus
・Aspirational rewards
・Choice overload (overly complex combos, confusing missions)

CONTEXT

This research was developed to deepen the understanding of the behavior of TaDa Delivery Lovers Plus users in Mexico, combining declared data with previously observed transactional insights.

The main objective is **to identify how usage habits are formed, what triggers recurrence, and in which moments TaDa becomes part of the users' consumption routine.**

LOVERS PLUS

Lovers Plus represent TaDa Delivery's most loyal and recurrent users (**12+ orders**). They use the app habitually, with a weekly frequency about **2x higher than regular lovers**, and show a higher AOV.

Habit-driven users.

This group demonstrates high loyalty to specific brands and SKUs, strong adoption of RGBs, and a preference for **predictable, recognition-based benefits over transactional incentives.**

METODOLOGY

Mexico base: 2,230 users

Total responses: 111

Survey sent on: **10 Nov 2025 / 20 Nov 2025 / 03 Dec 2025**

Invitations via **email, in-app** and **push notification**

Incentive: **$50 MXN in Club TaDa points**

Statistical parameters

Confidence level: **95%**

Margin of error: **≈ ±8.8 p.p.**

METODOLOGY

Statistical Relevance by region

Reading: **exploratory**

METODOLOGY

Transacional data

TaDa Delivery transactional data (Oct/2025–Jan/2026) was analyzed comparing **Lovers Plus and Core users**. Core users placed 2–3 orders in the last 30 days and are less recurrent than Lovers Plus users.

A balanced sample of 5,000 users per cluster was used to ensure comparability and identify behavioral and operational differences.

METODOLOGY

The following analysis allows for **statistically reliable insights at the national level** and is recommended for guiding experiments and strategic prioritization.

SUMMARY

Block 01 **CONNECTION WITH TADA**

How users discover TaDa and which attributes sustain recurrent choice of the app

Block 02 **OCCASION BEHAVIOR**

When, for whom, and in which contexts TaDa is used, revealing its role in the consumption routine

Block 03 **OFF-APP BEHAVIOR**

In which situations users leave TaDa, where they migrate to, and which types of purchases are lost

Block 04 **BEHAVIOR CHANGE TRIGGERS**

Which frictions exist and which solutions have the greatest potential to recover frequency and volume

Block 05 **SERVICE CHECK & CONSIDERATIONS**

How TaDa is perceived, recommended, and integrated into daily life

Block 01

CONNECTION WITH TADA

How users discover TaDa and which attributes sustain recurrent choice of the app

How did you hear about TaDa Delivery?

A friend recommended it: **51.4%**

Instagram ads: **13.5%**

TikTok ads**: 11.7%**

Street advertising: **10.8%**

In-game advertising: **6.3%**

Other: **6.3%**

Main reason for choosing TaDa Delivery

Prices and promotions: 34.2%

Convenience (not leaving home): **23.4%**

Fast delivery: **13.5%**

App ease of use: **8.1%**

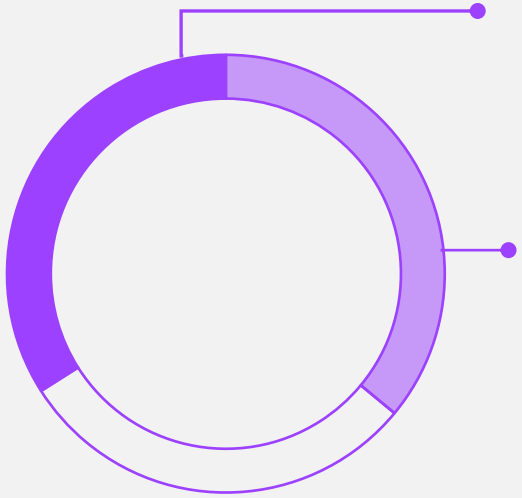

Product variety: **5.4%**

Loyalty program / benefits: **4.5%**

Delivery reliability: **3.6%**

Quick restock for my business: **3.6%**

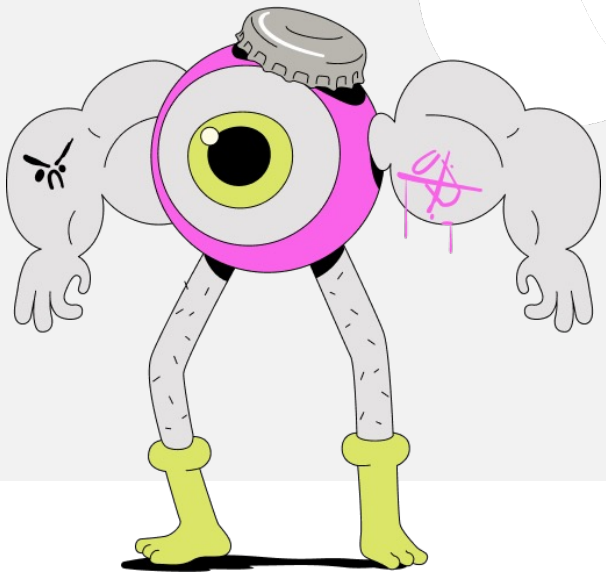

Other: **6.3%**

34%
Price/ promotion

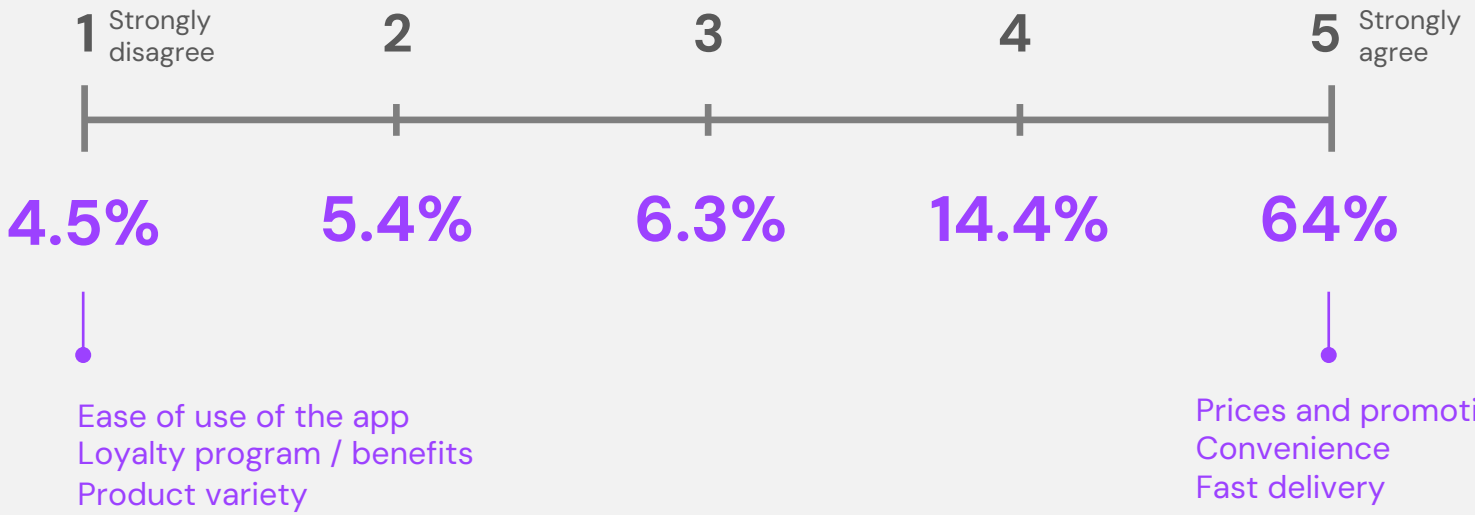

36%
Convenience/ fast delivery

Price opens the door. ***Convenience and spreed keep it open.***

(Based on your previous answer)

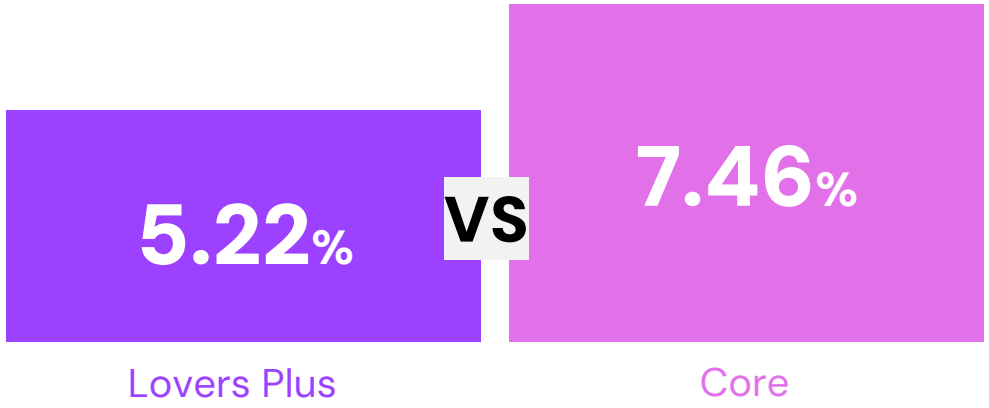

Do you think this is the main reason why people are interested in TaDa Delivery?

*Most people believe that **convenience and speed** are also key drivers of interest in TaDa, beyond price.*

Lovers Plus vs. Core
Promotions

Share of orders with promotions:
Between Nov/25 and Jan/26

Although "prices and promotions" are the top reason for choosing TaDa, ***Lovers Plus place fewer orders with promotions than Core.***

Hypotheses

- **Recommendations accelerate habit formation** more than any financial incentive
- **Lovers Plus value incentives as recognition of loyalty and habitual behavior**, not as triggers for purchase decisions
- Their preference for predictable benefits reflects **functional status expectations rather than price sensitivity**
- Lower discount usage among Lovers Plus indicates a more mature cluster, **less driven by decision-making incentives and more driven by habit reinforcement and recognition**.
- Price is the entry trigger, but **habit, predictability, and availability sustain recurrence**

Opportunities

Benefits

- Segment **promotions by maturity**
- Gradually **reduce discounts as users increase frequency**, keeping strong discounts for acquisition and early usage
- **Create rewards based on frequency and consumption,** not just price (e.g., reduced delivery fee, no coupon needed).

UX

- **Make it easier to repurchase favorite SKUs** (a “buy again” button, combos with preferred products)
- **Reposition price-focused messaging toward habit** (“when you run out, just order,” “arrives cold and right on time”)

Onboarding

- **Simplified** and **fast onboarding**
- **Showcase everyday use cases** on the welcome page
- Reinforcing **other attributes** (Club TaDa, loyalty) to build habit

Block 02

OCCASION BEHAVIOR

When, for whom, and in which contexts TaDa is used, revealing its role in the consumption routine

For which occasions do you use TaDa Delivery the most? (multiple choice)

Any regular day, no specific reason: **39.6%**

Gathering with friends at home: **34.2%**

Weekend: **25.2%**

Watching a soccer match at home: **23.4%**

Parties and celebrations: **21.6%**

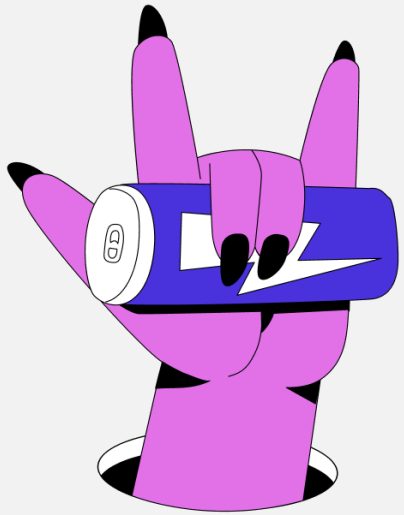

Family meals: **18%**

To restock my business: **12.6%**

Watching TV: **12.6%**

Romantic dinner: **0.9%**

Other: **6.3%**

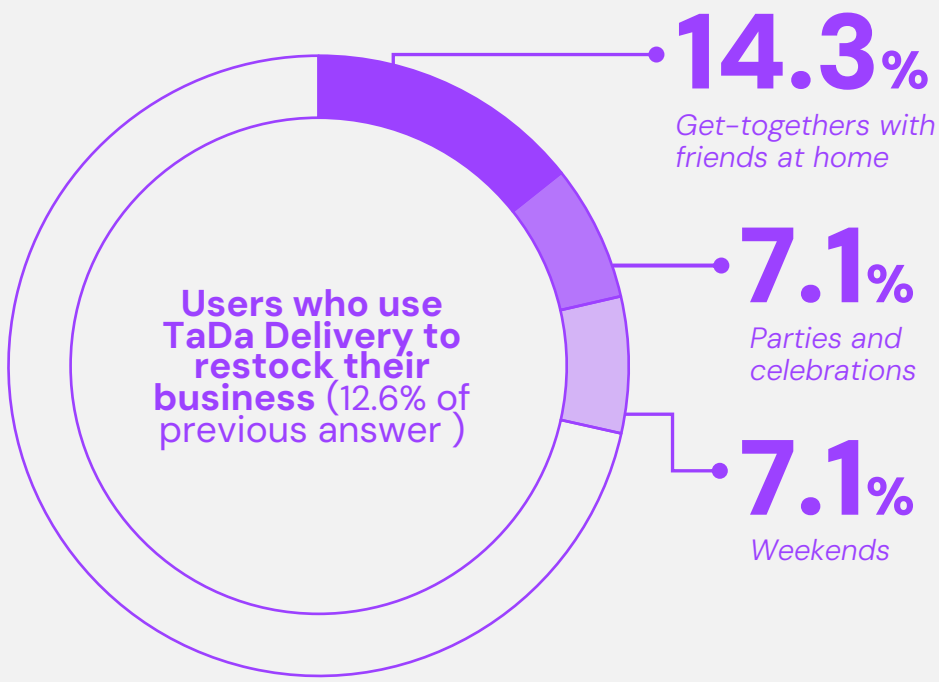

(Based on the previous answer)

People who use TaDa Delivery to restock their business also reported using it to:

14.3%
Get-togethers with friends at home

7.1%
Parties and celebrations

7.1%
Weekends

Among users who use it to restock their business, there is a segment that also uses TaDa Delivery ***for other occasions***

**Relative distribution of choices within this group*

TaDa is widely used in everyday, ***spontaneous situations***
Meeting friends *can be a trigger to buy on TaDa*

What would make you order even more on TaDa Delivery? (multiple choice)

Exclusive discounts: **40.5%**

Free delivery: **28.8%**

Exclusive coupons: **26.1%**

Loyalty program: **26.1%**

Guarantee that drinks arrive cold: **22.5%**

Easier payment methods: **14.4%**

Greater product variety: **13.5%**

Guaranteed delivery within the promised time: **11.7%**

Better communication of promotions and offers: **10.8%**

Easier purchasing for my business: **8.1%**

Other: **2.7%**

*Even though they purchase fewer discounted items than Core, Lovers Plus still value **exclusive benefits as a form of recognition, not as a purchase trigger.***

The loyalty program is among the top 4 reasons for ordering more

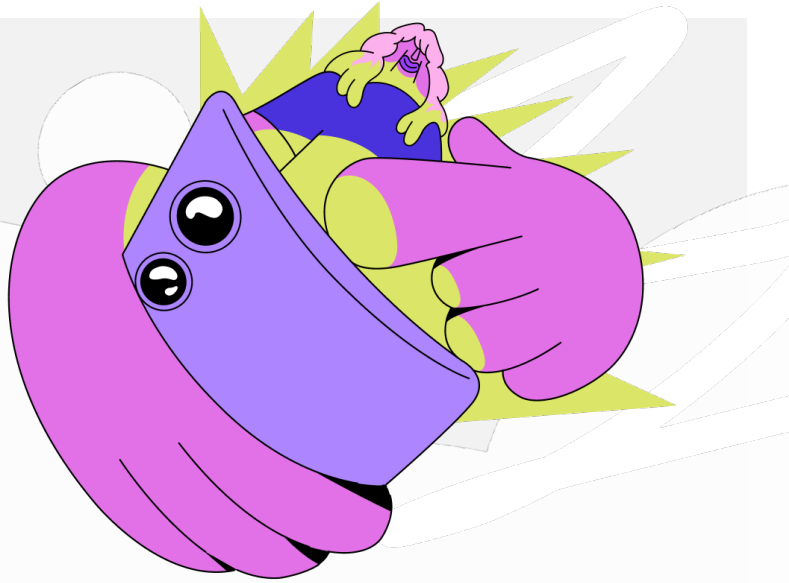

An important aspect of the service is ensuring drinks arrive cold

(Based on the previous answer)

Among users who want exclusive discounts, which other benefits are also desired?

**Relative distribution of choices within this group*

Users who ask for exclusive discounts are not just looking for lower prices: they want ***recognition through exclusive coupons, Club points, and free delivery.***

How often do you drink beer during the week?

More than 3 times a week: **42.3%**

3 times a week: **18%**

2 times a week: **14.4%**

Once a day: **8.1%**

More than twice a day: **6.3%**

Once a week: **6.3%**

Less than once a week: **4.5%**

I do not drink beer: **0%**

All Lovers Plus declared consuming beer

Beer, when purchased with another category, ***increases GMV and MACO.***

Which categories are missing in the app? (multiple choice)

Snacks: **36.9%**

Grocery: **25.2%**

Ready-to-eat food: **25.2%**

Spirits: **23.4%**

Wines: **22.5%**

Meats: **22.5%**

Pharmacy: **13.5%**

Personal care and hygiene: **11.7%**

Pet supplies: **9.9%**

Household cleaning: **4.5%**

Gas: **4.5%**

Other: **3.6%**

Food interest is strong across subcategories (20%+).

*New categories expand daily use by **adding convenience and new occasions.***

More than 1 in 3 respondents **want snacks**

1 in 4 want **grocery items and ready-to-eat food.**

Nearly 1 in 4 feel the app is missing **meat options**

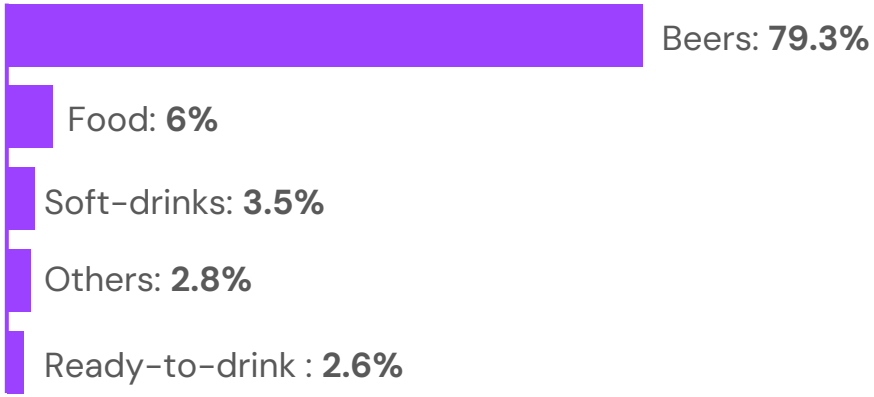

Lovers Plus vs. Core
Most purchased categories

*Lovers Plus **do not diversify** across more categories*

***Beer has an even higher share** among Lovers Plus*

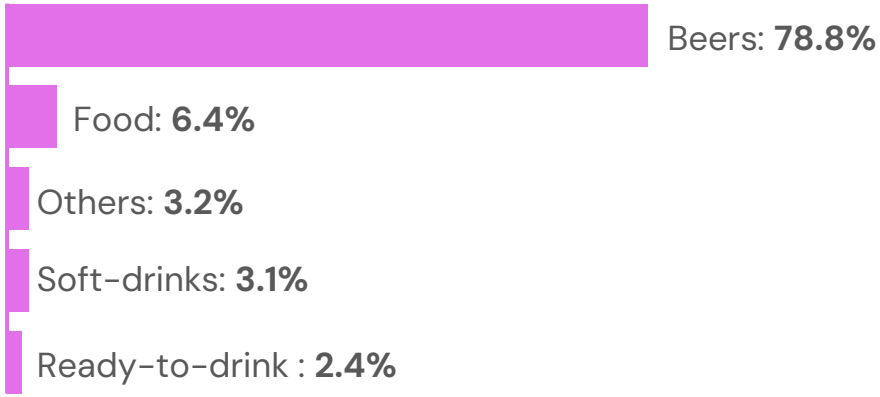

Mix distribution (%):
Between Oct/25 and Jan/26

Lovers Plus

All other categories: **<2% each**

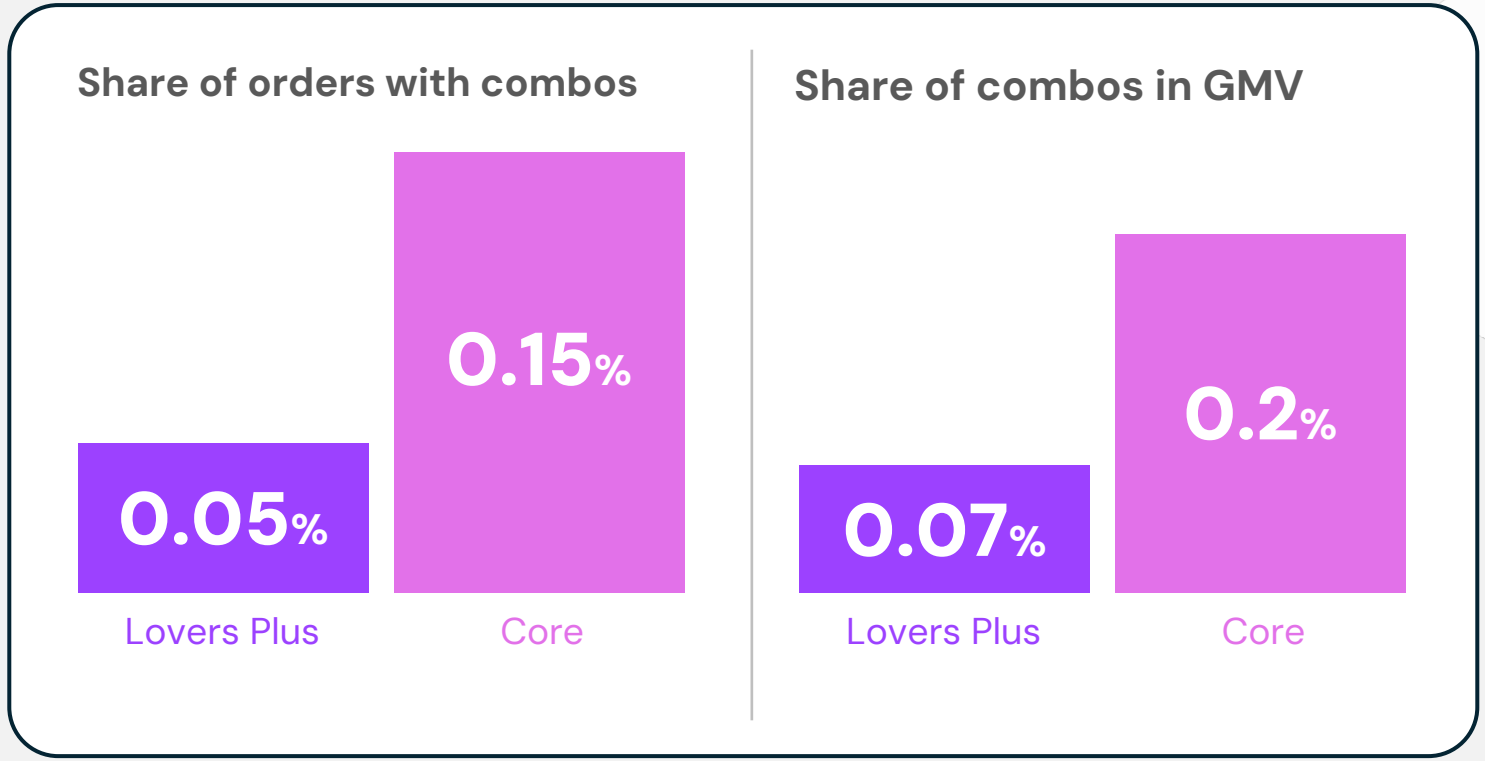

Core

All other categories: **<2% each**

Lovers Plus vs. Core
Combos

Lovers Plus don't reject combos **— they reject irrelevant ones.**

Combos are 3x more relevant *among Core users than among Lovers Plus users.*

Low combo adoption ***reflects current assortment mismatch****, not rejection of the combo concept*

The most frequent categories in combos

(during the period between Oct/25 and Jan/26)

1st — Spirits + Soft Drink

2nd — Spirits + Soft Drink + Snack

3rd — Spirits + Soft Drink + Ice

4th — Wine + Soft Drink

***Spirits** were the backbone of the combos.*

*During the analyzed period, **no combos including beers or top-selling SKUs** were available.*

*The most effective combinations start with **beer as the core** and add just one functional, occasion-based complement.*

Who are the beverages for? (multiple choice)

For personal consumption: **58.6%**

To share with family or friends: **36%**

For events at home (with guests): **22.5%**

For meetings or events outside the home: **18%**

For resale: **9.9%**

As a gift: **4.5%**

For another person at a different address: **4.5%**

How long does it take to consume the products

Right after the order arrives: **49.5%**

1–2 days: **31.5%**

3–4 days: **11.7%**

5–7 days: **4.5%**

More than 7 days: **2.7%**

TaDa works as an extension of the refrigerator: ***fragmented purchases over a few days****, not long-term stockpiling.*

*Top SKUs are **large, returnable formats** (Victoria Mega, Corona 940ml, etc.), and for 81% consumption is immediate or within 1–2 days.*

*This indicates that TaDa is used to **supply recurring social occasions.***

When you buy in the app, do you usually keep the same brand and bottle/can size?

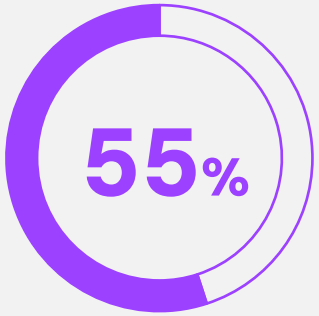

Yes, I always buy the same ones: **30.6%**

Almost always, but sometimes I change: **24.3%**

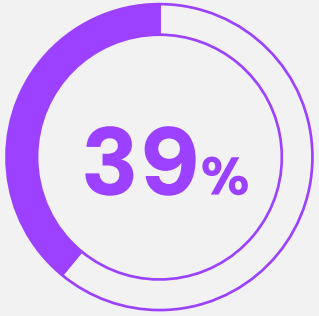

It depends on the prices: **21.6%**

I buy others if they are not available at the moment: **17.1%**

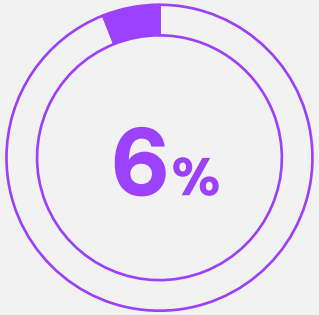

*Lovers Plus have a clear preference for **brand and size.***

Frequently stick to the same brand and size

Switch due to external factors

Abandon the purchase if their favorite SKU is unavailable

Hypotheses

- Lovers Plus use TaDa for convenience, **avoiding multiple store visits and replenishing large volumes**
- High SKU repetition indicates **the decision was already made before opening the app**
- For Lovers Plus, **TaDa is more about practicality than impulse buying**
- Users who find substitutes of the same brand or similar format **tend not to abandon the purchase**
- Including Lovers Plus' preferred brands in combos could help **increase combo purchases**
- Lovers Plus avoid cognitive effort. Promotions, substitutions, and combos must be **effortless and predictable**

Opportunities

Communication

- Emphasize **shared consumption** (combos, progressive discounts)
- **Highlight large formats** as "higher returns," not just "cheaper"
- **Highlight functional benefits**: don't carry it / don't go out / get it done fast
- Communicate TaDa Delivery as: "**The right place for your go-to beer** and whatever you need to complete it."

UX

- Facilitate **repeat purchase** of the same SKU in short reorder windows
- Combos with **SKUs previously purchased**
- Create **smart substitution** to reduce abandonment
- **Use cross-sell as an occasion-based complement**, positioned as a smart suggestion

Price & benefits

- Reward recurrence (e.g., **reduced delivery fee for the next X purchases**) instead of single-use coupons

Block 03

OFF-APP BEHAVIOR

In which situations users leave TaDa, where they migrate to, and which types of purchases are lost

In the last 30 days, in which channels did you buy products that you could normally buy on TaDa Delivery?

Convenience stores (e.g., OXXO, Modelorama): **44.1%**

I did not buy outside TaDa Delivery: **26.1%**

Local store/warehouse: **18%**

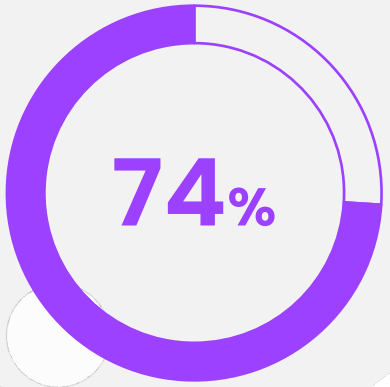

Physical supermarket: **10.8%**

Competing apps (e.g., Rappi, DiDi Food, Cornershop): **10.8%**

E-commerce/marketplace (e.g., Walmart, Mercado Libre): **9%**

Specialty stores (wine shop, gourmet store): **8.1%**

Direct delivery from supplier/brand: **4.5%**

Purchased outside TaDa at least once in the last 30 days

*TaDa does not lose users to competitors — **it loses moments to physical retail**.*

How often, on average, do you make this type of purchase outside TaDa?

Two or more times per week: **25.2%**

Weekly: **18%**

Monthly: **9%**

Rarely (once every 3 months): **33.3%**

Never: **14.4%**

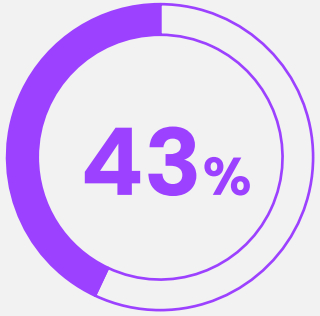

When purchasing outside TaDa Delivery, it's usually:

Highly variable: **52.3%**

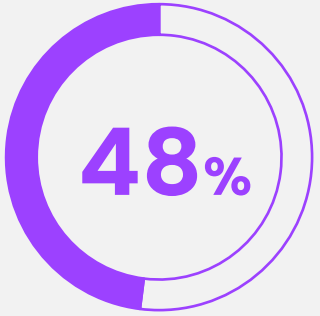

Occasional small items (low value): **27%**

Event/celebration purchases (high value): **11.7%**

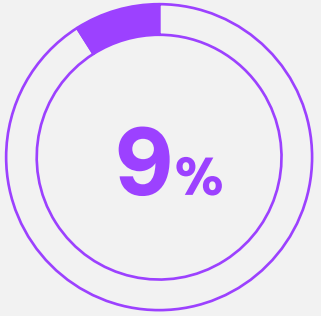

Larger restocking purchases (medium/high value): **9%**

Purchase outside weekly or more often

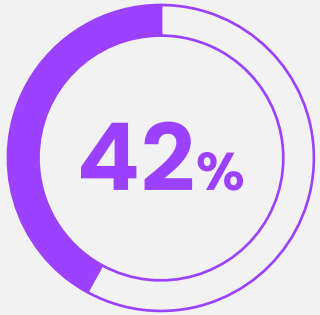

Purchase outside rarely or never

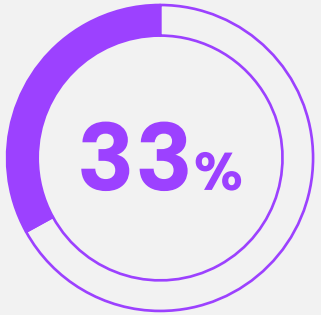

Purchase outside monthly

(Based on your previous answer)

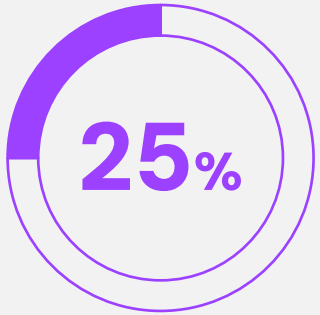

Among people who reported shopping at convenience stores in the last 30 days (44%):

Shop two or more times per week

Shop weekly

Shop rarely (once every three months)

Convenience stores are a fast and convenient alternative.

~75% of people who shop at convenience stores do so ***weekly or more often.***

If TaDa Delivery had a paid monthly subscription with more benefits, which ones would interest you most?
(multiple choice)

Exclusive discounts: **32.4%**

Discount coupons: **31.5%**

Free delivery: **29.7%**

Gifts or surprise products: **24.3%**

Club TaDa points to redeem for experiences (soccer tickets, concerts, theater, etc.): **22.5%**

I would not pay for more benefits: **21.6%**

Early access to new products: **5.4%**

*Subscriptions focused on **predictable savings see higher adoption**.*
Aspirational or "premium" benefits gain less traction

1 in 5 users **would not pay for a subscription**

Hypotheses

- TaDa is used **for generic, not special occasions**, sustaining frequency
- TaDa loses moments, not preference — and moments are where habits are reinforced or broken. Physical retail wins when it offers **predictable immediate availability**, not a better value proposition.
- Immediate consumption + large formats indicate **fragmented social consumption**, not stockpiling
- Subscriptions do not automatically create new value; **they only make sense if they reduce friction or uncertainty**
- A profile that purchases outside the app suggests an **interest in more planned shopping**. This opens up opportunities for: **larger and returnable purchases, with a retail price guarantee**
- For users who go to convenience stores, **Delta (Club cap scanning) is also an opportunity to retain users** (they acquire multiple caps, which gives them more reasons to open the app).

Opportunities

Communication

Explicit communication of **the cost of leaving** (time, effort, travel).

Post-purchase

- Focus on **predictability** (“arrives in up to X min”) and clear real-time delivery communication

Benefits

- Subscription should focus on **predictable delivery and pricing**, not experiences

Service

- Test **new mechanics** (Turbo or pick-up) to reduce perceived friction and capture a share of in-store purchases through in-store pickup.

Club TaDa

- Proceed with the Delta project, with the goal of turning offline consumption into a digital retention driver in TaDa Delivery

Block 04

BEHAVIOR CHANGE TRIGGERS

Which frictions exist and which solutions have the greatest potential to recover frequency and volume

What situations lead you to buy outside TaDa? (multiple choice)

I was out of the house (saw it and bought it): **27.9%**

Better offer on my favorite brands: **25.2%**

I needed the product immediately (didn't want to wait): **18.9%**

My purchases were outside TaDa Delivery hours: **18%**

I did not find my preferred brand or format: **15.3%**

Specific promotion in another channel: **12.6%**

Combo/kit offers not available on TaDa Delivery: **9.9%**

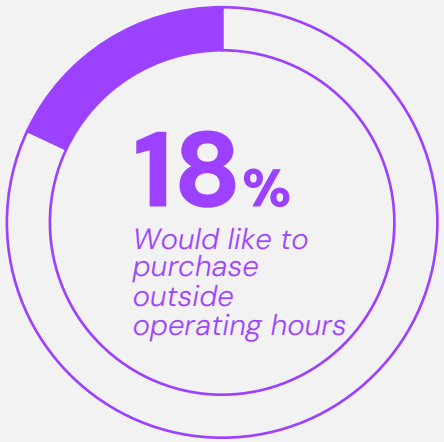

I preferred to choose in person (physical store): **7.2%**

Problem with my last TaDa order (error/delay): **5.4%**

Quick replenishment of my personal stock: **5.4%**

To facilitate purchasing for my business: **3.6%**

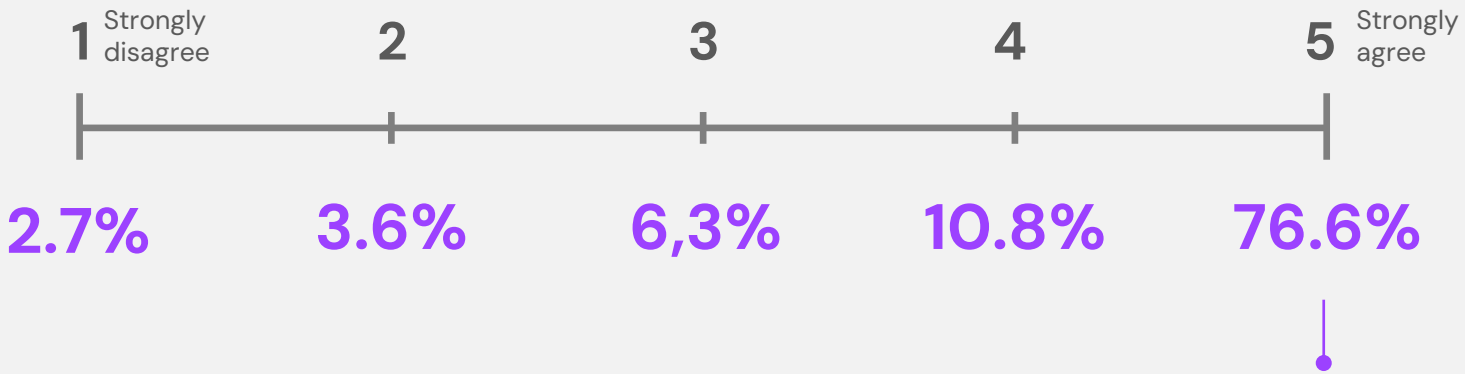

***10%** of Lovers and Lovers Plus **downgrade to Core** on a monthly basis*

—

Operating hours weigh more than order issues (5.4%)

If TaDa solved the reasons selected before, would you buy more on TaDa?

Purchases outside TaDa do not reflect lack of intent, ***but friction.***

I was out of the house (I saw it and bought it)
I needed the product immediately (I didn't want to wait)
My purchases were outside TaDa Delivery's operating hours
A better offer on my favorite brands
I couldn't find my preferred brand or format

Which solution would make you migrate purchases you currently make outside the app to TaDa Delivery?

(multiple choice)

Same or better prices/promotions: **45%**

Guaranteed availability/stock of my preferred brand: **27.9%**

Free delivery or lower cost for recurring orders: **26.1%**

Quick pick-up or locker option: **14.4%**

Exclusive combos/kits for occasions (games, parties): **12.6%**

Guaranteed product substitution with prior approval: **9.9%**

Loyalty program with clear benefits: **9%**

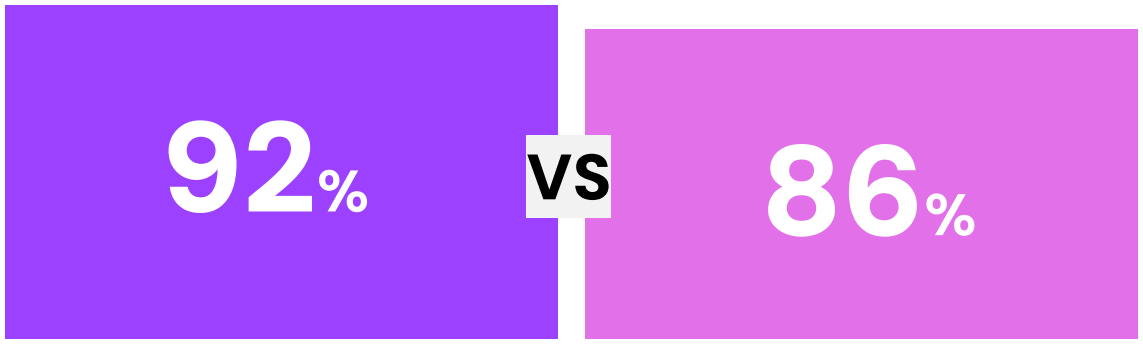

More payment methods in the app (online card, PayPal, Apple Wallet, etc.): **7.2%**

Migrating purchases does not depend on persuasion, but on risk removal.

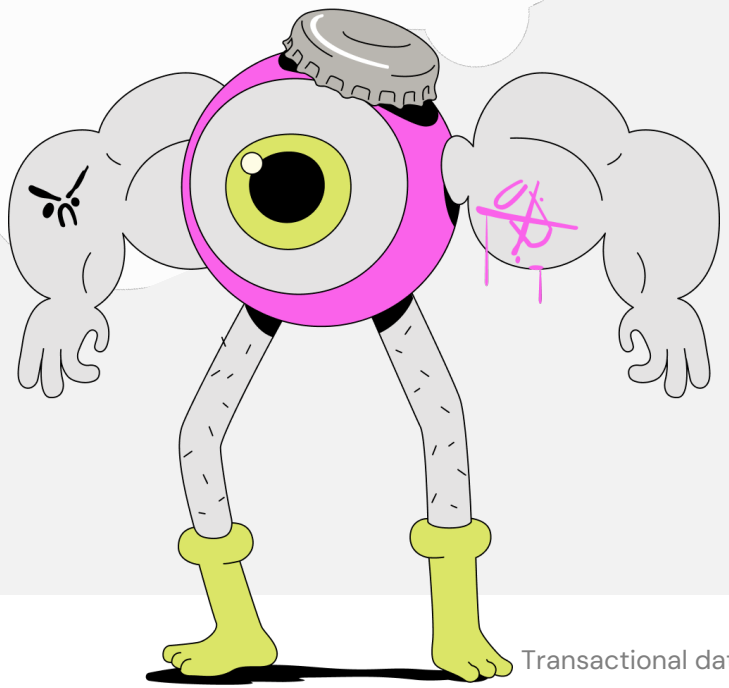

*The user doesn't want to try something new; they want to be **confident TaDa will work when they need it***

Lovers Plus vs. Core
Perfect Orders

Perfect Orders
Between Oct/25 and Jan/26

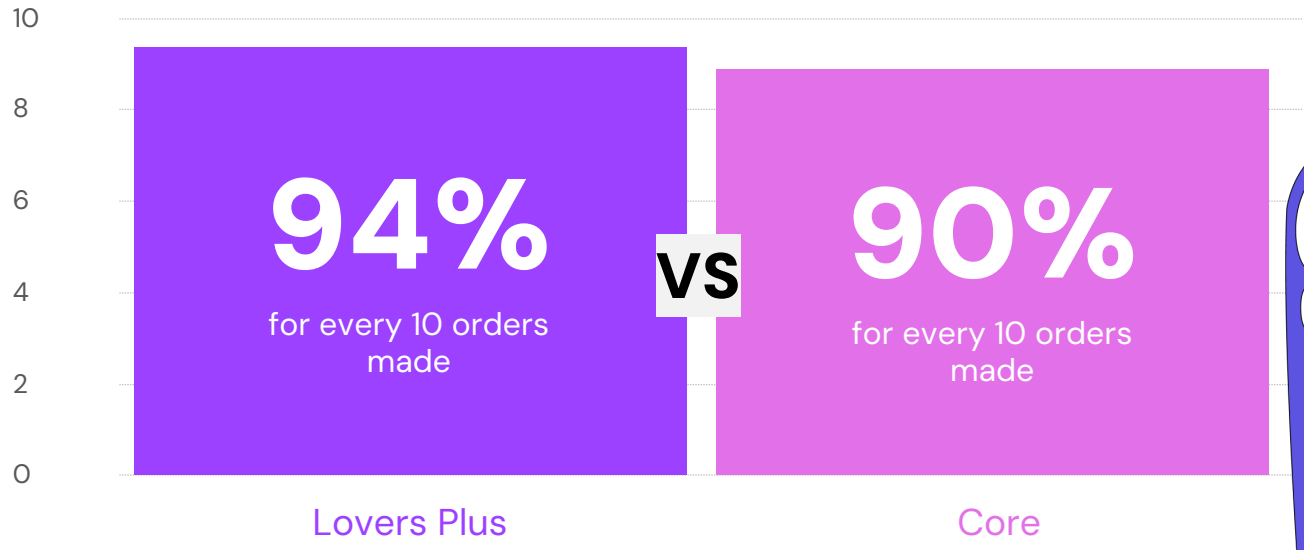

Lovers Plus show a higher service level than Core, with 6 p.p. more Perfect Orders, indicating ***greater operational consistency.***

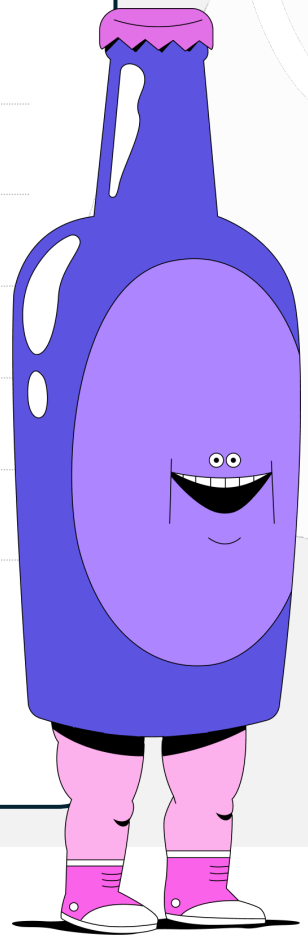

Lovers Plus vs. Core
SLA 36

Orders delivered within the 36min SLA
Between Oct/25 and Jan/26

Core segment has on average 4 p.p. lower share of orders delivered within the SLA (36 min) compared to Lovers Plus segment

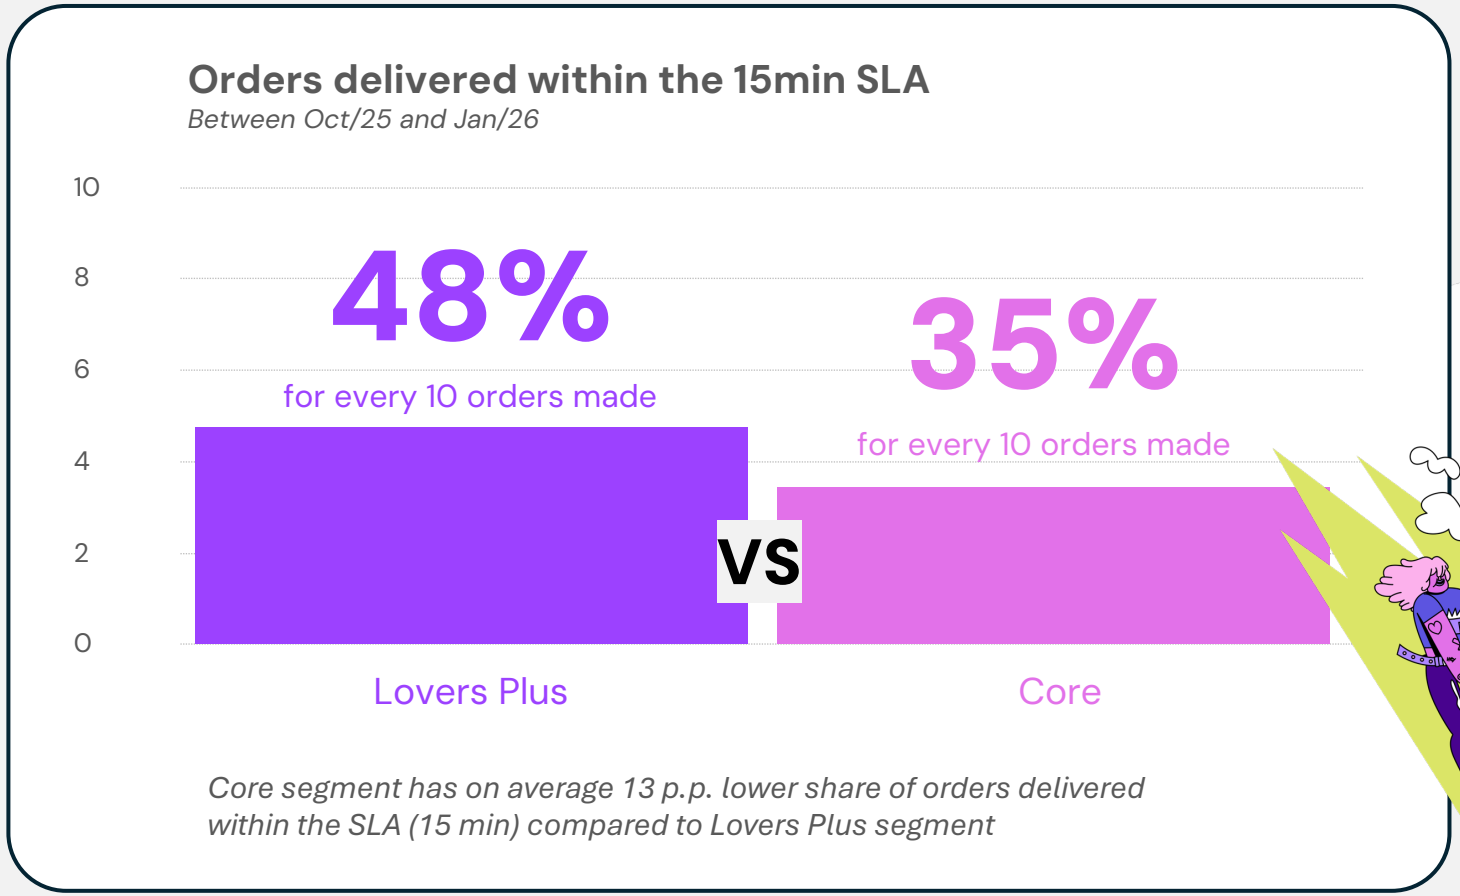

SLA consistency is a core habit driver.
Small delivery delays compound into loss of trust over repeated orders.

Small gaps matter at high frequency.

Lovers Plus vs. Core

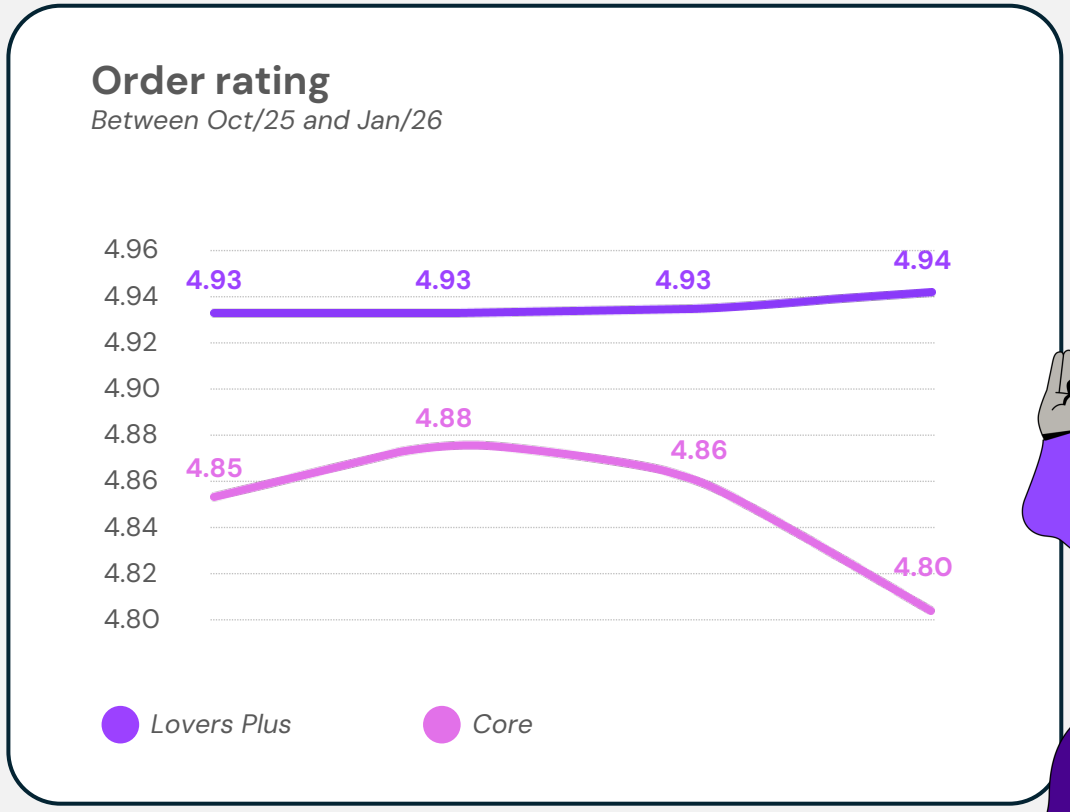

SLA 15: **Ultra-fast, predictable delivery radically increases recurrence.**

The impact of speed on retention is not linear. *When delivery consistently happens below the 15-minute SLA, users shift from "ordering when needed" to relying on TaDa by default. This threshold effect explains the sharp increase in recurrence and retention among Lovers Plus.*

Lovers Plus vs. Core
Order rating

Lovers Plus show higher and more stable ratings because they experience a more predictable journey with a higher rate of perfect orders. ***Recurrence is linked to operational trust not just satisfaction.***

Hypotheses

- Users already want to buy more but **are blocked by operational trust, not motivation.**
- Price is more relevant **when applied to favorite SKUs**
- **Reducing friction has more impact** than creating new promotional stimuli
- The unavailability of favorite SKUs has a **disproportionately emotional impact**
- Scaling Lovers Plus requires reducing friction, **simplifying missions, and ensuring perfect orders for the other clusters**

Opportunities

Benefits

Behavior-reactive benefits: Reduced delivery fees after consecutive successful orders

Seller

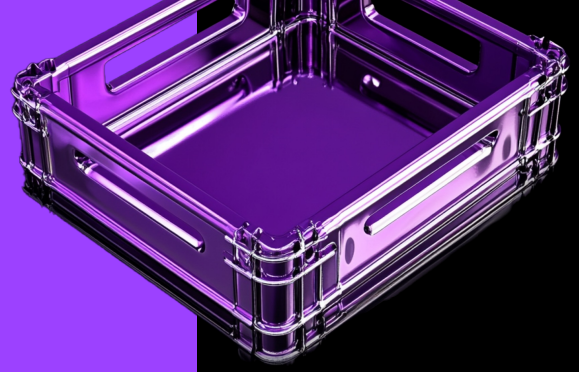

- Prioritize **availability of leading SKUs**

UX

- Improved **interface stock** signaling with clear “Available now” status
- **Guided substitution** instead of automatic
- Fast **reorder discounts** (e.g., delivery coupon valid for 48–72h)

Service

- **Continue testing extended operating hours** (this is already happening and faces multiple regulatory barriers)

Block 05

SERVICE CHECK/ CONSIDERATIONS

How TaDa is perceived, recommended, and integrated into daily life

What do you mention when recommending TaDa?

(multiple choice)

Prices/promotions are good: **31.5%**

It has your favorite beer brands: **22.5%**

Drinks arrive cold: **12.6%**

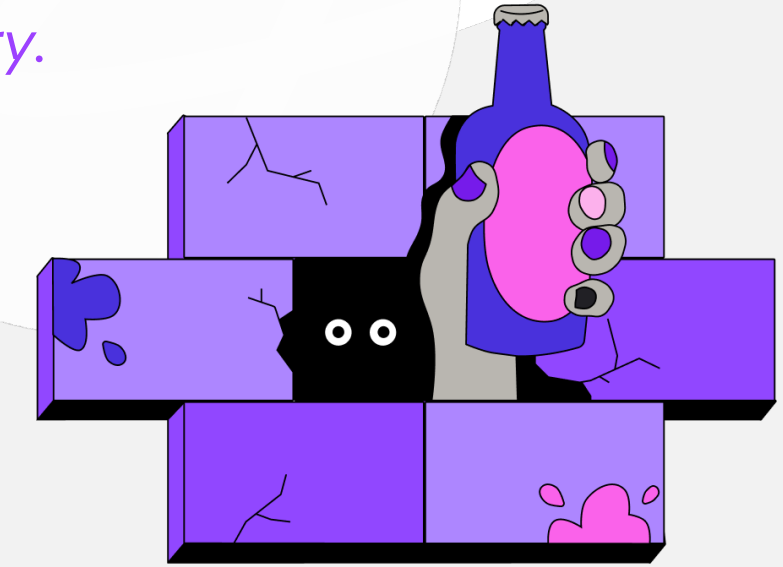

Delivery is fast: **11.7%**

Loyalty program exchanges points for benefits: **9%**

Free delivery on the first order: **7.2%**

I do not usually recommend TaDa: **2.7%**

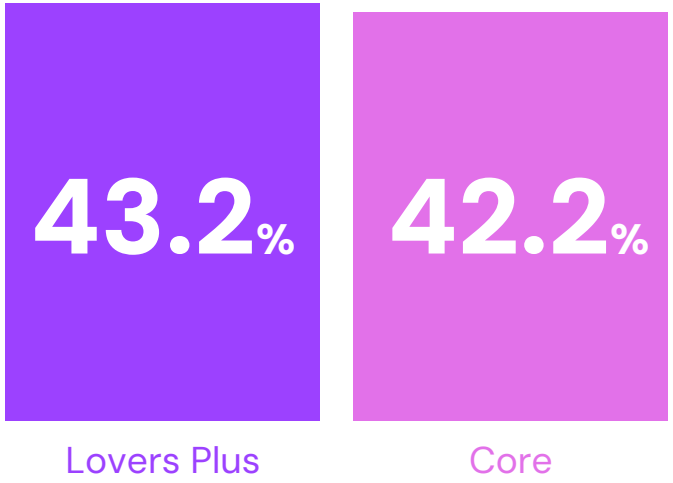

Prices and favorite brands are more recommended *than cold drinks and fast delivery.*

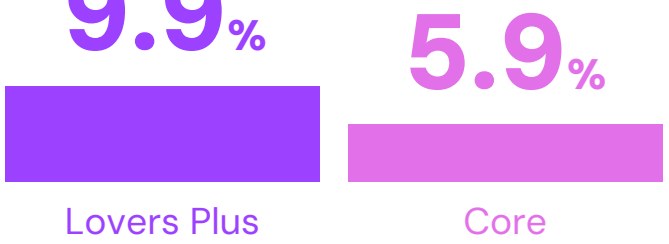

Lovers Plus vs. Core

Purchases with discounts and coupons

Average number of purchases with a promotion applied

Average number of purchases with a coupon applied

Between Oct/25 and Jan/26

Core is more sensitive to direct incentives *than Lovers Plus*

If TaDa disappeared tomorrow, what would change in your routine? (open question)

"I would have to go out to the store / OXXO / Modelorama"

"More time and effort to buy beer"

"Less convenience on weekends or at night"

"Having to carry bottles again or buy in-store"

"It would be more complicated, more uncomfortable, more expensive"

"I would have to go out at night"

"I would go back to buying at the store"

"It would be less practical; I would lose convenience"

TaDa is not missed for what it is, but for what it removes: *effort, time, carrying, and planning.*

Hypotheses

- **Recommendation is based on basic attributes**, not differentiation
- Choices are mostly driven by **routine efficiency**
- Functional relationships scale better than emotional ones when they are embedded in daily routines.
- Loyalty is driven by the **absence of problems**, not by delight

Opportunities

Communication / CRM

- Make the **“cost of leaving” explicit**. Example: “3 things you don’t do when you order from TaDa: go out, carry, come back”
- Differentiate Lovers Plus from other clusters in the messaging. For acquisition, the focus is on price and convenience; **for Lovers Plus, the focus is on continuity and predictability**
- Position TaDa Delivery as an “**essential service**,” not a promotional app:“Always works. Always arrives.”
- Treat Lovers Plus as **operational premium**: fewer banners, more clarity.
- **Communicate accumulated reliability**: “You’ve already received X orders without errors.”
- Reinforce continuity, not novelty: Highlight history, patterns, and consistency.

Block 06

TAKEAWAYS

Key insights and strategic implications

Product strategies to replicate Lovers Plus habits

Acquisition

- Focus on price and convenience.
- Clear value proposition.
- Remove friction by simplifying sign-up.

Retention

- Highlight previously purchased SKUs.
- Reinforce patterns: “You usually buy this”.
- Make repurchasing easier.

Frequency

- Clear, occasion-based missions.
- More context and surprises along the journey (e.g., rewards at checkout) and fewer promo banners.
- Positively reinforce recent on-time deliveries.
- Treat the user as “premium”.

Service strategies to replicate Lovers Plus habits

Acquisition

- Reduce perceived risk and accelerate first use (the first order must build trust).
- Guarantees for cold beverages and deliveries within the SLA.
- Fast refunds.
- Immediate issue resolution.
- Guided substitutions.

Retention

- Brand and favorite SKUs are critical (availability of leading SKUs).
- Perfect Orders as a retention KPI.
- Smart substitution.
- Clear order status and real-time updates.
- Clear delivery windows and coverage.

Frequency

- Offline integration: encourage app usage during offline pickup moments.
- Predictability and speed (better “always in X time” than “sometimes very fast”).
- Benefits tied to recurrence.
- Reduced delivery fees after X orders.

CONCLUSION

Lovers Plus have already turned TaDa into a habit: they use the app recurrently, functionally, and as **part of their routine**.

Growth does not depend on persuasion, but on removing friction, ensuring predictability, and reinforcing availability, **so TaDa becomes the default, not the decision**.

Scaling this behavior to other clusters means making TaDa the automatic choice whenever a need arises: simple, reliable, and effortless.

Thanks!
